Khanong, Bangkok

SOFT SKILLS

- Teamwork
- Time Management
- Problem Solving
- Effective Communication
- Critical Thinking
- Leadership

TECH SKILLS

- Python Flask
- PHP
- Bootstrap
- Data Structures
- Algorithms
- MySQL, SQLite
- Web Development
- Bitbucket

LANGUAGES

- Myanmar(Fluent)
- English(Fluent)
- Chinese(Basic)

PROFILE

As a undergraduate student, I studied computing in BSc in Edinburgh Napier University. Throughout my undergraduate journey, I had developed my technical skills by developing school projects. I learned Python Flask, PHP languages. For the design systems and sample works, I used Figma for the whole process of the projects. I had to make group project as a undergraduate student, that's I am pretty well versed in communication and problem solving skills due to working and cooperating with my peers.

EDUCATION

Bachelor of Computing (BSc in Computing) 2024-2025
Edinburgh Napier University
Passed Bachelor with Higher Grade

Higher National Diploma 2019-2022
Pearson Diploma

PROJECTS

Academic Projects

Hospital Appointment System DEVELOPED IN (HND)
Hospital Appointment System is a web based system. The customer can register and can book based on the doctor and the user can request and send mail to the admin side. And the admin has full permission to manage the system.
Technologies Used: PHP, JavaScript, MySQL

Music Streaming Website AUGUST,2024 - SEPTEMBER,2024

First I developed the wireframes and sample design system with Figma and then developed a Music Streaming Website based on the design and the user can listen the music from that website. The user can play next song and previous song and the user can pause and play the song. The user can look the top song list and album list which are the most played items in website. The user can search everything with search bar.

Technologies Used: Python Flask, SQLite, Figma, Bitbucket

Event Management System (Group Project)

As a group project, I got Frontend Developer role. I had responsibilities for developing the designs and frontend. I made time management and I developed all of my responsibilities within targeted time. And then, I helped the backend developer for developing some features which are website setting, password recovery. The admin can change all of the contents of the website and if the users their passwords they can use password recovery feature and that will send the link to email to change the website

Technologies Used: Python Flask, SQLite, Figma, Bitbucket
